

MOOBS / MALE BREASTS

It's not just women who have boob-jobs – man-boobs or 'moobs' can be as much of a confidence sapper, especially when you want to:

- Look good in a fitted shirt when the meeting gets heated and the jackets come off;
- Be able to wear fitted T-shirts and crew necks without looking like the Michelin man;
- Look forward to holidays in the sunshine, without worrying about people staring when you strip off to your swimwear;

The answer is Vaser Lipo – this non-invasive technique:

- Reduces the fat content – permanently,
- Tightens the skin,
- Is relatively painless,
- Has minimal recovery time (hours, rather than weeks)
- And costs less than half as much as the surgical procedure.

UNWANTED HAIR

Unwanted hair can appear all over the body some men tend to have more hair than others. Some men are happy with hair for example on their chest but may also be very hairy on their back which they perhaps don't like. Laser Hair Removal is a great pain free treatment!

FROWNLINES

If you're bothered by forehead wrinkles, frownlines and permanent creases, then why not take a look at:

- Botox
- Dermal fillers
- Medical Microdermabrasion

ACNE

Acne scarring can be an unsightly reminder of having to deal with that condition. It's hard not to feel self-conscious if you've been left with visible scars – but that can change with a little help!

Today's cosmetic treatments can now reduce – or in many cases, completely remove – acne scars and there are several options for treatment including:

- Dermaroller
- SmartXide DOT Laser
- The OBAGI range of products

LOVE HANDLES

Love handles tend to be more associated with women but this isn't the case. Men can also suffer from love handles. Sometimes you can have an extensive work out program but some parts just won't budge. Love handles can be removed using Vaser Lipo. Vaser Lipo can also be used to treat excess stomach fat and bingo wings. You can also consider Accent for love handles.
